3.22 Product and Services Delivery Overview

Vendors must describe their ability to provide professional services, technology equipment including related products and support services to the System and the various authorized entities. The response to this requirement should, at a minimum, include a map with an indication of the locations where products may be delivered plus the number and type of support personnel or other resources that may be employed to service procuring entity purchase orders (a very basic example map for a fictitious company is provided in Appendix B). The narrative in response to this specification should include, at a minimum, a general overview of the proposed services and an overview of how the services are to be provided in the locations indicated.

RJ Young: Statewide Service Coverage

Our service model is designed to allow every technician to produce service excellence as part of an everyday routine. Our service model focuses on increasing customer satisfaction while minimizing machine downtime. RJY has implemented multiple channels in which to communicate with our customers making the experience convenient, quick and easy to manage.

Statewide Service Coverage

Vendors must thoroughly describe their procedures for resolving customer problems and complaints including timelines and escalation measures.

Service Call Escalation Procedure

This explains to the technical department the procedure to use when the machine they are working on is not fixed in a reasonable time or the same problem continues to occur.

- If the Technician is unable to resolve the problem within two hours or has worked on the same machine twice for the same problem, the Technician is required to contact the Service Manager. The Service Manager will evaluate the situation, and if it cannot be resolved rapidly, a hotline to the manufacturer will be opened immediately.
- The Service Manager will perform or confirm that all remedies the hotline suggests are accomplished as soon as possible. If the hotline indicates parts are needed these parts will be installed. The results will be fed back to the hotline for further diagnosing if the problem is not resolved.
- The Technician will contact the Service Manager and provide them with the hotline case number and customer contact information plus all other pertinent information regarding the situation. This will be placed on the Service Manager's daily to do list and will be followed until it is resolved.
- If the Technician feels that the copier will be out of service for more than eight (8) business hours after the call has been placed or requires off-site service, a loaner copier will be provided within eight (8) business hours.
