INTRODUCTION

1.1 Purpose of This Request for Bid

The Alabama Community College System (ACCS) is partnering with other Alabama Higher Education entities to request bids from technology equipment manufacturers and/or dealers on behalf of the System institutions and other authorized entities. The ACCS is comprised of the twenty-three (23) community colleges, two (2) technical colleges, one (1) military institution, and the Alabama Technology Network (Appendix A). Any institutions or programs that may be acquired or added to the ACCS during the life of this contract will automatically be added as entities eligible to procure products from the contract. Any four-year institution or K-12 district/system which wishes to join during the life of this contract may be added as an eligible entity. Additionally, the public K-12, two, and four-year institutions listed in Appendix A are also eligible to purchase from this contract.

Each entity will generate its own purchase orders, payments, etc., and delivery must be made according to the instructions on the purchase order. The intent of this request is to establish an annual contract for technology related equipment to be purchased on an as needed basis for the listed entities as needs arise during the contract period.

The purpose of this Request for Bid (RFB) is to establish a contract on a competitive basis with qualified technology equipment suppliers, distributors, and/or manufacturers who shall directly supply technology equipment and value-added professional services, including software and peripherals, and maintenance and support services to qualified purchasers. Peripheral and computer component manufacturers are excluded from this procurement.

This RFB is not designed to meet the E-Rate requirements specified by the Universal Service Administrative Company. The Alabama Community College System shall not negotiate on behalf of any party with a Letter of Agency. The System shall not certify an FCC Form 470, nor receive and evaluate bids, nor negotiate with service providers of E-Rate products and services.

The Alabama Community College System reserves the right to negotiate with vendors for a product or product line that was not available at the time of the Request for Bid.

The thrust of the RFB is to obtain greater volume price discounts by combining the volume of purchases from participating entities within the State of Alabama with administrative savings that will result from the maintenance of a single, comprehensive contract for each selected vendor.

This RFB is prepared under the authority of ACT No. 2003-392. This procurement will result in a multiple source award.

Term – Bid awards issued under this Request for Bids shall be for an initial period of one year to renew automatically for one additional year if not canceled by The System prior to the one-year anniversary date of the award letter. The System shall have the option to extend awards for an additional (third) year by giving notice of such extension prior to the two-year anniversary of the award letter.

Summary Scope of Work

The selected vendor(s) shall accept purchase orders from and deliver technology equipment, including general-purpose software and peripherals, to authorized procuring entities. Vendors are required to provide maintenance services on equipment that is purchased. Optionally, vendors may provide installation, training and support services directly related to the efficient use or operation of the purchased equipment.

TSA RESPONSE: ACKNOWLEDGED AND ACCEPTED

1.2 Scope of Procurement

The scope of procurement includes a wide range of manufacturer supplied technology equipment, including peripherals, general-purpose software, maintenance, professional consulting services, and support services. Vendors shall not provide any form of application development services under the terms and conditions of the contract. Educational offerings including special purpose educational software and hardware configurations are included.

Additionally, more detailed contact information related to dedicated account managers, inside support representatives, dedicated enterprise solution architects, service coordinator(s), accounting, and executive management personnel will be provided as requested for bid evaluation and/or as requested by any customer procuring products from this contract.

- Services
  - Presales Product Services – provided primarily by dedicated account managers and Inside Support personnel. This includes identifying and providing the proper options for a given need within an IT environment. Product comparisons, features, images, compatibility, and lifecycle information are available upon request. This may include more in-depth technical planning and consultation provided by an Enterprise Solution
Architect employed by TSA and/or Manufacturer. This service is provided as a means of providing ample information to the customer before or during the decision to buy. This service is provided free of charge for basic needs but is also available at a more in-depth level for a fee as a consulting service upon request. In-depth Presales Product Services may include, but is not limited to, penetration testing, network/datacenter assessment & design, SIEM analysis, & firewall migration planning. Pricing for these services may be obtained by contacting a dedicated TSA account manager.

- Post-sales Product Services - These services are delivered by Inside Support personnel, warranty certified technicians, and Enterprise Solution Architects and may be covered by manufacturer warranty, customer service programs, or delivered via billable services. Depending on the need, these services are designed to compliment and enhance the use and functionality of the customers’ purchased equipment. This includes both in-warranty repairs on authorized equipment, problem resolution, returns/exchanges (to the extent that they are available from the manufacturer), troubleshooting problematic systems via on-site service call, phone support, or remote troubleshooting sessions. In the event that a manager is not available, or as a situation requires, those personnel are empowered to immediately escalate to both executive management and directly to the technical and/or customer service resource(s) that will provide the quickest, most effective remedy to each customer situation. Contact with TSA’s executive management personnel may be requested by any customer at any time and, to the extent that the personnel are available, they will be connected immediately or will receive a return call as a priority.
  
  - Manufacturer Escalation – TSA will exhaust all efforts to provide the highest level(s) of service provided by all partnered manufacturer resources. Additionally, TSA personnel will make every reasonable effort to broker and provide collaborative support between multiple manufacturer parties in order to resolve technical issues and complete projects thoroughly and fully.
