INTRODUCTION

1.1 Purpose of This Request for Bid

The Alabama Community College System (ACCS) is partnering with other Alabama Higher Education entities to request bids from technology equipment manufacturers and/or dealers on behalf of the System institutions and other authorized entities. The ACCS is comprised of the twenty-three (23) community colleges, two (2) technical colleges, one (1) military institution, and the Alabama Technology Network (Appendix A). Any institutions or programs that may be acquired or added to the ACCS during the life of this contract will automatically be added as entities eligible to procure products from the contract. Any four-year institution or K-12 district/system which wishes to join during the life of this contract may be added as an eligible entity. Additionally, the public K-12, two, and four-year institutions listed in Appendix A are also eligible to purchase from this contract.

Each entity will generate its own purchase orders, payments, etc., and delivery must be made according to the instructions on the purchase order. The intent of this request is to establish an annual contract for technology-related equipment to be purchased on an as needed basis for the listed entities as needs arise during the contract period.

The purpose of this Request for Bid (RFB) is to establish a contract on a competitive basis with qualified technology equipment suppliers, distributors, and/or manufacturers who shall directly supply technology equipment and value-added professional services, including software and peripherals, and maintenance and support services to qualified purchasers. Peripheral and computer component manufacturers are excluded from this procurement.

This RFB is not designed to meet the E-Rate requirements specified by the Universal Service Administrative Company. The Alabama Community College System shall not negotiate on behalf of any party with a Letter of Agency. The System shall not certify an FCC Form 470, nor receive and evaluate bids, nor negotiate with service providers of E-Rate products and services.

The Alabama Community College System reserves the right to negotiate with vendors for a product or product line that was not available at the time of the Request for Bid.

The thrust of the RFB is to obtain greater volume price discounts by combining the volume of purchases from participating entities within the State of Alabama with administrative savings that will result from the maintenance of a single, comprehensive contract for each selected vendor.

This RFB is prepared under the authority of ACT No. 2003-392.

This procurement will result in a multiple source award.

Term – Bid awards issued under this Request for Bids shall be for an initial period of one year to renew automatically for one additional year if not canceled by The System prior to the one-year anniversary date of the award letter. The System shall have the option to extend awards for an additional (third) year by giving notice of such extension prior to the two-year anniversary of the award letter.

C2 Technology Group has read and agrees to comply.

Summary Scope of Work

The selected vendor(s) shall accept purchase orders from and deliver technology equipment, including general-purpose software and peripherals, to authorized procuring entities. Vendors are required to provide maintenance services on equipment that is purchased. Optionally, vendors may provide installation, training and support services directly related to the efficient use or operation of the purchased equipment.

C2 Technology Group has read and agrees to comply.

1.2 Scope of Procurement

The scope of procurement includes a wide range of manufacturer supplied technology equipment, including peripherals, general-purpose software, maintenance, professional consulting services, and support services. With technology constantly evolving, C2 Technology Group continues to stay up to date with industry trends and training, including continuous education with AESBL, BICSI, and our manufacturer partners. This allows us to provide the best value possible to our customers by offering them Electronic Security and Structured Cabling solutions that meet today’s needs with the future in mind.

Along with industry specific training, we also maintain a rigorous safety program which includes post-hire drug screenings, random drug testing, weekly safety meetings, and ongoing safety training.

Vendors must thoroughly describe their procedures for resolving customer problems and complaints including timelines and escalation measures.

Every project has a designated project manager assigned to it which allows for the customer to have access to that project manager’s office number, cell number, and email address. All of our managers are available 24/7 to respond to emergencies. Once contact is made to a manager regarding any issues, a resolution plan is determined between the manager and the customer. After the resolution plan is complete, the project manager will follow-up with the customer to ensure they are satisfied with the resolution. All of our current service contracts have a response time of less than 4 hours for all emergencies.

Vendors must submit customer satisfaction statistics or survey results concerning the quality of the products and/or services offered.

At C2 Technology Group, customer retention is a top priority. We take pride in knowing that we have continued to serve many of the same customers as when the company began in 2005. We do not currently have formal satisfaction statistics or survey results, however, along with the references listed with our response to this RFB, we would be more than happy to supply additional references upon request.

Vendors must thoroughly describe their ability to provide value added technical services including installation, training or directly related optional services and the geographic area where the services may be provided. C2 Technology Group’s Structured Cabling division provides services such as the installation of Cat5e, Cat6, Cat6A, Fiber Optic Cable, High Count Copper Cable, Coax, etc. We have extensive experience in cabling new facilities, renovations, building-out comm rooms, outside plant cabling, aerial cabling, directional bored pathways, and installation of wireless access systems. We hold certifications with every major structured

cabling manufacturer which will be included with our response. These services, along with our Video Surveillance and Access Control services are offered across the state.
